

# Projectiles

## Types & Applications

Projectiles clean when compressed against the internal surface of a hose, tube or pipe. Pressure is achieved as the projectile is approximately 20% to 30% larger than the internal diameter of the hose, tube or pipe. For instance, a 2" (50mm) projectile is recommended for a 1½" (38mm) hose. Individual circumstances may require a smaller or larger projectile. If too large it will not leave the nozzle, but if too small it will not clean effectively.

The enormous variety in types of couplings available today could render a recommended size inappropriate. When cleaning assemblies, a reduction in projectile size may be appropriate, as all recommendations are based on the most commonly used coupling sizes. Custom projectiles can also be developed.

All Ultra Clean Projectiles are made from virgin materials with a specific cell structure and density. This ensures a quality product capable of achieving most ISO-4406-99 and ISO-4405 cleanliness levels when our cleaning procedures are followed. Ultra Clean never uses rebonded, scrap or recycled materials in our projectiles like some other manufacturers.

### Ultra Clean

Universal application for use with hose, tube, pipe and assemblies. Removes fine particles of loose contamination and can also be used for product purging.

*Size range: 2mm - 95mm.*

### Tube

For use with all types of tubing or pipes. Strongly recommended for stainless steel with mild to medium amounts of contamination, surface rust or scale build-up. Removes mandrel lubricants, grease and oil after the bending process.

*Size range: 6mm - 65mm.*

### Abrasive

For use with tubes or pipes to loosen mild to medium amounts of contamination, surface rust or scale build-up. Always follow-up with an Ultra Clean projectile to clear away loosened contaminants and verify cleanliness. Can be used multiple times.

*Size range: 6mm - 120mm.*

### Ultra Scrub

For use on wet or dry applications of tubes or pipes to loosen medium to high amounts of contamination surface rust or scale build-up. Also navigates assemblies with sweeping bends or elbows. Always follow-up with an Ultra Clean projectile to clear loosened contaminants and verify cleanliness. Can be used multiple times.

*Size range: 6mm - 60 mm.*

### Ultra Clean 100mm-150mm

Ultra Clean Projectiles 100mm and larger are provided with a laminated backer to prevent air permeation. The laminated backer should be loaded into the nozzle last so that the air is pushing against it.

### Bulk Projectiles

Ultra Clean Technologies also offers Ultra Clean & Tube style projectiles packaged in bulk quantities. The bulk projectile program complements the Bench Mount Launchers for use in a production type atmosphere.

## Projectile Kits

### UC-P1-Projectile Kit

Includes:

- 11 bags of Ultra Clean Projectiles for cleaning out hose, tube and pipe applications up to ¼" to 1¼" ID.
- These projectiles also form a sub-kit that is included in the UC-EL8-DP Economy Launcher Kit.

### UC-P2-Projectile Kit

Includes:

- 13 bags of Ultra Clean Projectiles for cleaning out hose, tube and pipe applications up to ¼" to 2" ID.
- These projectiles also form a sub-kit that is included in the UC-CAP 2" Starter Kit.

*Note: All projectile sizes are also available in bulk quantities. Ask your sales rep or call for details.*
